Plant Reilly's Choice Shrubs to Complete the Home Grounds

Fruiting Age Trees

IT has been the custom and is now with most nurserymen to dig and sell to the planter fruit trees at one and two years of age, requiring the planter to develop them in the orchard to Fruiting Age size. When you take into consideration that you plant from 30 to 80 trees on an acre, it is expensive to develop the young stock in the orchard as compared with producing 8,000 to 10,000 trees in the nursery on one acre of ground.

Fruiting Age Trees Developed in Nursery

There is no doubt but that the nurserymen of experience can train and develop these trees and bring them to Fruiting Age size in the nursery much better and cheaper than the planter.

Strong Roots Ready to Take Hold Quickly

Fruiting Age trees properly grown to insure successful transplanting and thrifty after-growth should be root-pruned or transplanted at two years of age. Root pruning is done by cutting under with the digger and allowing the trees to remain in the original row until 4 or 5 years of age. This acts the same as transplanting, forming fibrous roots, retarding the growth, hardening up the wood, and forming fruit spurs.

13 Years of Proven Results

During the past thirteen years we have grown our Fruiting Age trees in the above manner and find that they live and grow after shipment as well as younger stock on this account.

Buy Fruiting Age Trees From Scientific Growers

We know of no other firm listing and selling root-pruned Fruiting Age trees, and would caution you in buying this grade of stock from nurserymen inexperienced in this separate and distinct branch. It costs more to produce, but is worth more to plant Root-Pruned FRUITING AGE TREES.

How to Prune and Plant

Fruiting Age trees require very little trimming. Round in the top, and prune the roots so that they will go into a hole about 18 inches deep, and 18 inches across. Plant these about 3 to 4 inches deeper than they stood in the nursery row, and pack the soil well around the roots. Do this two or three times, while filling the hole.

To Assure Early Fruit Yield

Some of these early-bearing varieties have already borne fruit in the nursery row, and should bear some fruit the year after planting. If they blossom the year of planting, the blossoms should be taken off, for the tree should have this nourishment for wood growth.

Dependable Trees, Free From Disease

These extra fine specimen trees are developed in the nursery row by men of long experience, kept free from disease and insect pests and brought to fruiting age in a more vigorous condition than you can develop young trees in your own orchard.

For our 2-year old trees—See pages 22 - 30
--

Fruiting Age Trees

We Recommend These to the Planter and Know That They Will Give Perfect Satisfaction

STANDARD APPLES

Fruiting Age	4-5 Years, 7-9 ft.	1 to 1½ Inch	Each \$1.25
Varieties: Baldwin, Duchess, Wealthy, Red Astrachan, Yellow Transparent, Banana, Rome Beauty, Stayman's, Northern Spy, Stark, Grimes' Golden, R. I. Greening, McIntosh, Transcendent Crab, Hyslop Crab, Cortland, Delicious, Gravenstein.			

STANDARD PEARS

Fruiting Age	4-5 Years, 7-9 ft.	1 to 1½ Inch	Each \$1.25
Varieties: Bartlett, Clapp's Favorite, Anjou, Duchess, Seckel, Kieffer, Bosc, Sheldon.			

CHERRIES

Fruiting Age	4-5 Years, 7-9 ft.	1 to 1½ Inch	Each \$1.25
Varieties. Early Richmond, Morello, Montmorency, Black Tartarian, Napoleon, Gov. Wood, Windsor, Schmidt's.			

PLUMS

Fruiting Age	4-5 Years, 7-9 ft.	1 to 1½ Inch	Each \$1.25
Varieties: Abundance, Burbank, Red June, Lombard, York State Prune, Shrop. Damson, Bradshaw, Reine Claude, Imperial Gage.			

PEACHES

Fruiting Age	2-3 Years, 7-8 ft.	7/8 to 1 Inch	Each \$1.25
Varieties: Elberta, Early Crawford, Late Crawford, Champion, Hale, Rochester.			

DWARF PEARS

Fruiting Age	4-5 Years, 5-6 ft.	7/8 to 1 Inch	Each \$1.25
Varieties: Duchess, Anjou, Bartlett.			

DWARF APPLES

Fruiting Age	4-5 Years	7/8 to 1 Inch	Each \$1.25
Varieties: McIntosh.			

QUINCE TREES

Fruiting Age, 4-5 Yrs., 6-7 ft.	Each \$1.25
Varieties: Orange, Champion.	

APRICOT TREES

Fruiting Age, 4-5 Yrs., 6-7 ft.	Each \$1.50
Varieties: Harris, Moorpark, Alexander.	

GRAPE VINES

Fruiting Age, 3-4 Years	Each \$0.50
Varieties: Concord, Campbell's Early, Brighton, Catawba, Niagara.	

CURRENT BUSHES

Fruiting Age, 3-4 Yrs.	Each \$0.70
Varieties: Cherry, Perfection, Fay's Prolific, Red Cross, White Grape.	

RASPBERRY BUSHES

Fruiting Age, 2 Years Trans.	Each \$0.25	10 \$2.25
Varieties: Cuthbert, St. Regis.		

RHUBARB ROOTS (Pie Plant)

Fruiting Age, 3 Year Plants	Each \$0.25	10 \$2.25
-----------------------------	----------------	--------------

Extra Selected Six-Year Stock

We can supply some Extra Selected 6 Year Old Large Size Trees at \$2.50 each.
Same varieties as the fruiting age.

ELBERTA PEACH

The best peach of its season; of great commercial value for its splendid shipping qualities. The fruit is rich yellow with red cheek, juicy and highly flavored. Very hardy.

Fruiting Age Trees

Plant Reilly's big, healthy, weather-hardened fruit trees, heavily rooted and beautifully branched. Well developed and ready to yield full sized, juicy fruit in the quickest possible time.

McINTOSH APPLE

Medium large, smooth, yellow, covered with brilliant crimson, flesh snowy white, very tender and aromatic. Trees are vigorous and a good annual bearer.

BARTLETT PEAR

Hardy, productive and an excellent shipper. The season's best eating and canning pear.

We recommend this collection of 6 varieties of fruiting age trees for your home garden.

Don't fail to take advantage of this special offer.

Plant Big Trees for Early Results

ORANGE QUINCE

Fruit large, bright yellow, of excellent flavor. A vigorous grower and an immense producer.

NAPOLEON

The Best Light Colored Sweet Cherry

LOMBARD PLUM

Medium large, dark violet red, flesh yellow, juicy and pleasant flavor; popular, hardy, valuable commercially.

Reilly Well Rooted Trees Best For the Orchard

The root system developed in the nursery is the life and vigor of the orchard tree after transplanting. To produce a good strong fibrous root system you must first have the best seedlings. We use nothing but the best and largest imported French seedlings for propagating Apple, Pear, Plum, Cherry and Quince trees. These are hand-pruned before planting to a spreading form and trenched in sand to allow the new cuts to callous before planting. After planting we apply fertilizer and manure to the top soil which is thoroughly worked in during the growing season by constant cultivation.

The above illustration of roots of fruit trees taken from up-land soil in our nursery represents the work and development of this particular part of the growing of a tree. With our improved methods of propagation and cultivation, it costs us no more to grow this strong rooted stock than it does the average nurseryman to produce the average root system. It is a fact borne out by many testimonial letters received from our customers that our stock has a more fibrous root system than that of other nurseries, enabling the trees to live and thrive after transplanting, developing wonderful growth and early maturity.

All our trees are budded on whole branched root imported seedlings. All scions for budding cut from our bearing orchards which enables us to guarantee them true to name and free from disease for they are inspected by a New York State Inspector.

SHRUBS PROVIDE THE NECESSARY FINISHING TOUCH FOR THE HOME

Hardy Flowering Shrubs

	Each	10
Strong, 2 Year, 2½ to 3½ ft.....	\$0.35	\$3.00

Except as Noted.

Butterfly Bush—Seems to attract butterflies in large numbers. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne by the hundreds on a flower head which is often ten inches long. It blossoms from early summer until frost; fine for cutting. 40c each.

Calycanthus (Sweet Scented Shrub)—Particularly desirable on account of the fragrance of the wood. Flowers are of a rare chocolate color, with an agreeable odor. 40c each.

Deutzia Crenata—A hardy, tall-growing shrub with double pink flowers; blossoms in June. The deutzia is among the most attractive of our flowering shrubs.

Deutzia, Pride of Rochester—Very early, large double white flowers, profuse bloomer and vigorous grower. A week earlier than Crenata.

Double Pink Almond—Produces very double, rose-colored flowers in great profusion in the spring. One of the most charming early flowering shrubs. 50c each.

Forsythia (Golden Bell)—This is a pretty shrub of medium size. The flowers are drooping, yellow, and appear very early in spring before the leaves. Among the very best early flowering shrubs.

Golden Elder—One of the best of the colored shrubs, foliage a rich golden yellow. One of these plants in a bed, row, border, or on the lawn is a very conspicuous feature.

Japanese Barberry—Valuable for low hedging or grouping; as a hedge it will grow so dense and strong that nothing can get through it. The plant is dwarf, with spreading or drooping branches; foliage in the spring is a bright green, changing to brilliant crimson in the autumn; bears clusters of scarlet fruit, conspicuous from October to January. 50c each.

New Red-Leaved Japanese Barberry—The foliage is of a rich, lustrous, bronzy-red, becoming more brilliant as the season advances, turning to shades of red, orange and scarlet in the fall. Needs full exposure to the sun to bring out the brilliant coloring. 70c each.

Prunus Triloba (Double Flowering Plum)—A charming shrub of vigorous growth. Blossoms very early in spring before the leaves appear, and produces a mass of very double deep pink blossoms. 3 to 4 ft., 50c each.

Prunus, Pissardi (Purple Leaved Plum)—A small purple leaved tree for the lawn, that retains its color perfectly throughout the entire season. It is very ornamental and beautiful. 5 to 6 ft., 50c each.

GOLDEN ELDER

HONEYSUCKLE—Pink Tartarian

LILAC PURPLE

WEIGELA ROSEA

HARDY FLOWERING SHRUBS—Continued

SNOWBERRY, WHITE

Althea or Rose of Sharon—Blooms late in August and September, at a time when so few other shrubs are in blossom; flowers large and brilliant color; makes an elegant flowering hedge. Red, purple, white and variegated leaved. 50c each.

Coralberry—*Symphoricarpos Vulgaris* (Indian Currant)—Vigorous, quick growing shrub similar to snowberry, except fruit is red. Rose colored flowers in June and July.

Hardy Hydrangea (*Paniculata Grandiflora*)—It is hardy, enduring the severest winters out doors without protection. It is easily transplanted, not one in a thousand dying; it never fails to blossom the first year planted; no matter how small the plant, it immediately buds out in great profusion of flowers, many of them as large as the head of a full grown child. When the specimens first open they are greenish white, later they turn to a pure white, and still later to a delicate pink. The hydrangea should be cut back at least one-half of each season's growth in order to get the largest specimens.

Honeysuckle Tartarian — Bush form; they have bright and pretty fragrant flowers, followed by showy berries that last through the fall. Make desirable and attractive hedges, borders or single specimens. Colors, white, pink and red.

Hydrangea arborescens grandiflora alba — Also called "Snowball Hydrangea" and "Hills of Snow." The blooms are of the very largest size, of pure snow-white color. One of its most valuable characteristics is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it doubly valuable to every owner of a garden; perfectly hardy. 50c each.

Japan Quince—Very early in the spring this fine old shrub is completely covered with dazzling scarlet flowers, followed by small quince-shaped fruit which is quite fragrant. Grows bushy and dense with protecting thorns. 70c each.

Kerria Japonica—A medium dwarf shrub with beautiful globe-shaped flowers of bright orange. July. 50c each.

Lilac—A well known shrub that should be in every garden. Purple, white and red.

Philadelphus (Virginalis)—A new variety of exceptional merit. Vigorous and tall, with flowers in dense clusters. Large, double, pure white flowers.

Snowball, Common—A well known favorite shrub of large size; bears clusters of pure white flowers in May and June. 70c each.

Snowberry—Very ornamental, hardy shrub. Small, pink flowers followed by large, waxy white berries, which remain during winter.

Spiraea, Anthony Waterer—A beautiful dwarf shrub that throughout the season continuously yields an abundance of rich crimson flowers.

Spiraea Billardi—A hardy, free growing shrub. During July every branch and twig is tipped with a spike of beautiful blood-red flowers 4 to 6 inches in length.

Spiraea Thunbergi—Forms a dense, fluffy bush 3 to 5 feet high; the feathery foliage, which is a peculiar but pleasing shade of yellowish green, changes in autumn to bright red and orange. 50c each.

Spiraea Van Houttei—The grandest of all spiraeas. It is a beautiful ornament for the lawn at any season, but when in flower it is a complete fountain of white bloom, the foliage hardly showing. Perfectly hardy and an early bloomer.

Syringa (Mock Orange)—Very hardy, vigorous grower with very fragrant, showy white flowers.

Thunberg's (Thunbergi)—A Japanese species of small size, with narrow, linear leaves and small white flowers.

Weigela Candida—Of vigorous habit and erect growth, a choice variety of pure white flowers, blooming in June, and to some extent all summer. Desirable for border, for grouping and make fine specimen plants for the lawn.

Weigela Eva Rathke—One of the most attractive and very distinct varieties; flowers deep carmine red. 70c each.

Weigela Rosea—An elegant hardy shrub with fine rose-colored flowers. Blossoms in July.

The Old Fashioned Garden of Hardy Perennial Plants

Price of all Perennials (except where otherwise noted) 25c each; 10 for \$2.00

GRANDMOTHER knew and loved them, tended them with a born care—with a realization of their beauty and splendor under favorable cultivating conditions. Her home garden was full of favorites that "came back" every spring and gave a wealth of bloom from early spring to late fall. The flowers she loved have shared in the spirit of improvement and we are offering greatly improved varieties of Hardy Perennials that graced the home garden of bygone years.

PHLOX

COLUMBINE

RUDBECKIA

Chrysanthemum—Hardy. They produce lavish display of bloom in October and November and are most welcome when other trees and plants have lost their leaves, as they supply flowers for the table until late November. Thrive anywhere. Can supply in red, rose, white and yellow.

Delphinium or Larkspur—The hardy Larkspurs are easily among the finest of all our perennial plants. The prevailing colors are rich, clear shades of blue. The taller kinds furnish long spikes of bloom that are strikingly decorative and last a long time as cut flowers. Plants have a long season of bloom; can be prolonged by keeping the seed stalks cut out; supply plenty of water. The dark, handsome foliage is neat and attractive throughout the whole season. Plants are perfectly hardy. Bloom from June until frost.

Digitalis or Foxglove—Stately and highly ornamental plants when well grown, with flower stems at least three feet in height. Fine for the mixed border or planted singly in half shady places near a walk or drive. The racemes of the flowers are often two feet in length, containing scores of prettily spotted, thimble-shaped flowers. Perfectly hardy. Colors: rose, white, purple, yellow. 3 for 60c.

Gaillardia or Blanket Flower—Among the most attractive and effective of our hardy perennial plants. Thrive in almost any position or any soil. Bloom from June till autumn. Gorgeous flowers, 2 or 3 inches in diameter, dark red, brown in center with bands of crimson-orange and vermillion; borne on stems 18 to 24 inches long. When used for filling in front of shrubbery, Gaillardia adds a dash of color which is very effective.

Hollyhocks (Double)—Colossal spikes of bloom, 5 to 8 feet high, produce bold and showy effects which cannot be secured with any other plant. Effective among shrubbery, in the herbaceous border and along fences and boundaries. Double white, pink, red, maroon and yellow.

Rudbeckia or Golden Glow—Grows 5 to 7 feet and glows golden yellow until frost. Flowers golden yellow. 3 for 60c.

SWEET WILLIAM

Dianthus Barbatus—The old favorite, with its ringed appearance and prominent "eye." We can supply them in separate colors, viz.: Pink, Red and White, also Mixed Colors. 3 for 60c.

PHYSALIS (Chinese Lantern Plant)

Francheti—Everyone knows this Perennial, on which bright orange-scarlet lanterns have been seemingly hung in carnival array. 2 feet.

TRITOMA (Red Hot Poker)

Of perfect form, brilliant scarlet, the opened lower petals being trimmed with orange. Smooth, thick flower stalks a yard long with single fiery cone at the top. Tritomas are one of the great bedding plants. 30c each.

PAINTED DAISY (Pyrethrum)

Hybrid Single. A profusion of chrysanthemum-shaped flowers from June through September. A mixture of colors of various shades, including white, pink, rose and darkest crimson. Their long stems and lasting qualities make them exceedingly valuable for cut flowers. Grows 2 to 3 feet high.

COREOPSIS

YELLOW—One of the most popular hardy plants. The flowers are of a rich golden yellow, of graceful form and invaluable for cutting; in bloom from June until autumn. It succeeds everywhere. Height 1½ to 2 feet. A group of these plants furnishes an unfailing mass of rich, glowing color. The plants grow vigorously in any sunny position.

DAISY, SHASTA

Flowers white, 3 to 4 inches in diameter, borne on long, wiry stems; blossoms when cut remain fresh and in good condition for ten days to two weeks. Very hardy perennial; continues to bloom during several months. 2 feet.

HARDY PERENNIAL PLANTS—Continued

GLADIOLUS

The most attractive of all the summer flowering bulbs. Can be grown with very little care. Should be planted from the middle of April into May. Set bulbs 2 to 4 inches deep and 6 to 9 inches apart. 15c each; 10 for 90c.

Augusta—White, faint lavender stripe.

America—Soft flesh pink.

Etendard—White with red center.

Francis King—Vermilion scarlet.

Herada—Pure mauve.

Niagara—Yellow.

DAHLIA

Price, 25c each; 10 for \$2.00

Collarette—Red and white John Walker—White.

Emily—Lavender. Red Hussar—Red.

Flora Dora—Red cactus. Snow Clad—White pompom.

Jack Rose—Dark crimson. Sylvia—Pink and white.

Variegated—Red and white.

PAEONIES

The rival of the rose in beauty and fragrance. The paeonies after once planted will pretty nearly take care of themselves and are one of the most popular of the hardy perennials. Plant in spring or fall. We have them in red, white and pink. 45c each; 10 for \$4.00.

PAEONY

GERMAN IRIS

This beautiful flower should be considered indispensable in every collection for the wild garden, shrubby border, margin of water, rock-work, etc. They are admirably adapted and should not be overlooked. They thrive in almost any soil or situation without care and scarcely any place can be found where they may not be used to advantage. They come into bloom in May and last several weeks. We offer these in the following varieties: Florentine (purple), Queen of May (rosy violet), Celeste (sky blue), Madam Chereau (lavender, white border), Flavescens (soft yellow).

PHLOX (Hardy Perennial)

Among hardy perennial plants no class is of more importance than the phloxes, succeeding in almost any soil and position and flowering through a long season. While they will continue in good condition and flower freely for many years without attention, yet they respond quickly to and are improved by liberal cultivation. White, pink, red, lavender and salmon pink. 3 for 60c.

GLADIOLUS

POPPY, ORIENTAL

A very striking orange-scarlet flower with purple center. These make a brilliant splash of color in any garden. 2 to 3 feet. June. 35c each.

AQUILEGIA (Columbine)

These old-time favorites need no introduction to a garden enthusiast. They are among the earliest to bloom in the spring, and they thrive in all shades.

CANTERBURY BELLS (Campanula Media)

An old favorite; also known as "Cup and Saucer." Grows 2 to 3 feet high, and blooms incessantly through July and August, with a profusion of bell-shaped flowers. Separate colors, Pink, Blue and White, also Mixed Colors.

CARNATIONS, HARDY

Excellent for planting in garden after danger of frosts is past. Will bloom abundantly from July until late fall. Excellent also for forcing indoors for winter. Colors, red, white. 1 foot.

PINKS—Dianthus

Among the most esteemed and valuable of hardy plants. Blooms in profusion; great variety of colors. Spicy fragrance. 1 foot. June.

ANEMONE—Windflower

Japanese Anemones are among the best and most attractive pinks.

Whirlwind—Well shaped, double, white flowers.

HOLLYHOCK (*Althea Rosea*)

Grapes

REQUIRE little space, and when properly trained are an ornament to the garden or vineyard. The soil for the grape should be dry. When not naturally so, it should be thoroughly drained. For maximum crops it should be deeply worked and well manured, always bearing in mind that it is essential to have them in a warm, sunny exposure.

PRICE OF ALL VARIETIES OF GRAPES (Except as noted)

	Each	Ten	Hundred
2 year, No. 1, Strong Vines	\$0.20	\$1.75	\$15.00

Brighton Red. Bunch medium to large, long, compact, shouldered; berries medium; skin thin; flesh tender, sweet; quality best. A free grower and very productive.

Campbell's Early A fine new grape, ripening very early. Clusters large and handsome. Berries large, black, light purple bloom. Vine vigorous.

Catawba Berries large, round; when fully ripe of a dark copper color, with sweet, rich, musky flavor. Requires a long season to arrive at full maturity.

Concord A large, handsome, early grape; succeeds wherever grapes are grown; one of the old standard market varieties. Color black.

Delaware Bunches small, compact; berries rather small, round; skin thin, light red; flesh very juicy, sweet, spicy and delicious.

Moore's Early Bunch large, berry large, round with heavy bloom.

Niagara Bunch medium to large; berry large; skin thin and tough; color pale yellow when fully ripe. Tender, sweet and good. Best of the white varieties. Ripens with the Concord.

Worden A splendid grape of the Concord type. Vine vigorous, hardy and productive. Earlier than Concord. Black.

Mulberries

The mulberry is a very ornamental tree in garden or lawn. It is especially valuable in poultry yards, as the fruit drops when ripe through a long season.

PRICE OF MULBERRY TREES, 4 TO 5 FEET

	Each	Ten
Downing	\$0.85	\$8.00
New American85	8.00
Russian75	7.00

Downing Fruit very large, black, handsome, sweet, rich and excellent.

Russian Very hardy, vigorous grower; valuable for feeding silk worms. Fruit of small size.

New American Tree a hardy and vigorous grower; the best quality for fruit; ripe from middle of June to middle of September.

RASPBERRIES

Will do well on most any soil that is moderately rich. Keep well cultivated and free from weeds. As soon as they are done bearing each year, cut out the old wood to give more vigor to the young canes. Plant in rows five feet apart, three feet in rows.

	Twenty-five	Hundred	Thousand
Price of Strong, Healthy Plants	\$1.00	\$3.00	\$28.00

PARCEL POST: Raspberries can be sent by prepaid parcel post for 2 cents per bush extra.

ST. REGIS EVERBEARING

Red Varieties

Columbian Fruit very large, purplish color, rather soft, rich, sprightly flavor, best for canning. Bush a very strong grower, and great producer. 25—\$1.75; 100—\$5.00.

Cuthbert A remarkably strong, hardy variety; medium to large, crimson. The most reliable late market variety.

St. Regis It succeeds on all soils, whether light and sandy or on heavy clay; the canes are of a stocky, strong growth, with a great abundance of dark green foliage. Plants set in spring will give a small crop the following, and two crops each year after. In size, quantity and quality the fruit is equal to any of the other raspberries.

Offer No. 170

COLLECTION No. 20

25 Cuthbert Red Raspberries

25 Blowers Blackberries

25 St. Regis Red Raspberry

All for \$2.00

Black Varieties

Black Diamond Fruit nearly as large as Kansas, firm and of high quality. It is said to be the sweetest of the black raspberries. Extremely popular in the berry sections of this state.

Cumberland A healthy, vigorous grower; fruit very large, firm, quality about the same as Gregg. Keeps and ships well. The most profitable market variety.

Eureka Very early, large, fine quality. Hardy and good market variety.

Gregg Very productive, large size. The standard late market variety.

Kansas Strong, vigorous grower, bearing immense crops; good quality, the standard mid-season variety.

Ohio One of the old standard varieties that still retains its favor; large size; good quality; extremely hardy.

Plum Farmer Berries thick-meated with a bloom similar to Gregg. It ripens very early, maturing its crop in a very short period makes it one of the most profitable of the early market varieties.

STRAWBERRIES

Any good soil will grow strawberries; the better the soil the larger and better the crop. For field culture plant $3\frac{1}{2}$ feet apart 15 to 18 inches in the row. For garden 15 to 18 inches each way.

Express: \$1.25 per 25; \$2.50 per 100; \$15.00 per 1000. Mailed, Postpaid, \$1.50 per 25; \$2.75 per 100.

Brandywine (Per.) Late. The strong, upright growing plants produce an abundance of very large berries on erect fruit stems. They are of good color and shape and possess a very fine, peculiar flavor. Begins to ripen in mid-season, and continues until blossoms are killed by the frost.

Corsican The standard market variety. A great yielder and producer. The best in its season. Color bright red.

Gibson (Per.) Gibson is fast becoming the leading commercial variety in the U. S. It grows and succeeds in every soil and climate.

Premier (Perfect). Early to late. Noted for its long fruiting season. Ripens with the early varieties and continues fruiting until the late varieties come in. It is adapted to all sections of the country. Fruit is large to very large and holds size well through its ripening season. Foliage is smooth, bright and clean. A good plant maker. We believe Premier is the most extensively planted variety of strawberries at this time.

Senator Dunlap (Per.) Season early to medium; popular market sort. Very productive; dark red all through.

William Belt (Per.) A handsome variety that is giving remarkable satisfaction as a large productive berry for market or home use.

Everbearing Varieties

Mastodon (Everbearing). Large, luscious, deep red berries, juicy and sweet, from June until heavy frost. There is no other everbearing strawberry that can compare with Mastodon. The rich fragrance and exquisite aroma of the fruits are outstanding. It is by far the heaviest yielder of the everbearing type. Mastodon is in a class by itself.

Americus Mastodon Productive Superb
These varieties will fruit from early July until cold weather.

Price, Express: 25 for \$2.00; 100 for \$4.50.
Mailed, Postpaid: 25 for \$2.50; 100 for \$5.00.

All Strawberry Plants Will Be Shipped
the First Week in May

BLACKBERRIES

Plant on land moderately rich. Rows seven feet apart, three feet in row, cultivate shallow. Cut out the old wood each year.

PRICE OF 2 YEAR, STRONG PLANTS

\$1.00 per 25; \$3.00 per 100; \$25.00 per 1000. By Prepaid Parcel Post for 3 Cents Each Additional.

Blowers A new variety of Snyder type, it is very prolific; berry larger than Snyder. Canes very hardy.

Eldorado The vines are very vigorous and hardy. Berries large, jet black, borne in large clusters and ripen well together; they are very sweet, melting and pleasant, have no hard core, and will keep a week or more after picking.

Snyder Medium size, hardy and productive; no hard, sour core. The best blackberry for all purposes.

Ward This variety is a very vigorous grower and bears enormous quantities of fruit. Perhaps no other variety of recent introduction has attracted so much attention as this one. The berries are large, rich, sweet, tender and without a hard core.

BARBERRY HEDGING IS VERY ATTRACTIVE

Hedge Plants

There is no greater adornment than a fine hedge, and the necessary care is almost nothing. For marking lines it is as practical as a fence, besides being cheaper and much more sightly.

Privet, for best results, should be planted in a double row, rows 18 inches apart, with plants set 12 inches apart in the rows. They can also be set in a single row, 8 inches apart.

Privet, Amur River Resembles California in habits of growth, but is hardier and should be planted in sections where the California is liable to winter-kill.

PRICE:	10	100
18-24 in., well branched	\$ 1.00	\$ 8.00
2-3 ft., well branched	1.25	10.00
3-4 ft., well branched	1.50	12.50

Privet, California Of all ornamental hedge plants this is the most popular and more of it is planted than all others combined. Its foliage is a rich dark green and is nearly evergreen, remaining on the plant until mid-winter. It is of free growth and succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist.

PRICE:	10	100
18-24 in., well branched	\$0.75	\$ 4.50
2-3 ft., well branched	1.00	7.00
3-4 ft., well branched	1.25	10.00

Barberry, Thunbergi Of spreading habit growing extremely thick right from the base. The leaves are small, light green and toward fall assume rich, brilliant colors the fruit or berries becoming scarlet. There is no shrub so generally planted or more practical for all purposes where a beautiful foliage effect is desired. It is dwarf growing, bushy and rounding in form, easily pruned to the desired shape or form for hedges or single specimens. For hedge, foundation screen and in front of porch, plant 18 inches apart.

PRICE:	Each	10	100
18-24 in., well branched	\$0.30	\$2.50	\$15.00
2-3 ft.40	3.50	20.00
3-4 ft.50	4.00	30.00

Wm. J. Reilly Nurseries, Springfield, L. I.

Gentlemen: I received the rest of my order today and everything is in fine shape. My peach and cherry trees I got from you three years ago have fruit this year, and I am very happy about them.

Thanking you for your prompt service, I remain
HERMANN GRAMLICH.

CALIFORNIA PRIVET CANNOT BE EXCELLED FOR HEDGING

Hardy Climbing Vines

All 2 Year, No. 1 Plants

WISTERIA

Ampelopsis Veitchi (Boston Ivy)—This is one of the most beautiful ivies and the latest acquisition. It is a rapid grower and clings tenaciously to brick or stone walls, requiring no artificial fastening or training. It is hardy and thrives almost everywhere. 60c each.

Aristolochia Sipho (Dutchman's Pipe)—Brownish flowers, resembling a miniature pipe; splendid for archways or verandas. \$1.25 each.

Chinese Wisteria—One of the most elegant and rapid growing of all climbing plants; attains an immense size, growing at the rate of 15 to 20 feet in a season. Has long, pendulous clusters of flowers in May, June and in autumn. Purple, white and blue. 65c each.

Hall's Japan Honeysuckle — Almost evergreen, hardy and of strong growth. The flowers are fragrant, of a pure white changing to yellow. 50c each.

Jackmanni Clematis—Flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich velvety appearance. \$1.00 each.

Paniculata Clematis—Of very rapid growth, with handsome glossy foliage. The flowers are of medium size, fragrant, pure white. 50c each.

SEE LIST OF FRUITING AGE STOCK
ON PAGE 3.

Nut Trees

UNTIL recently little attention has been given to Nut fruits; this should not be so, as considerable profit may be derived from their cultivation. The growing of nut fruits is very simple in itself, requiring only ordinary labor and little expense. Many kinds make good shade trees in addition to the value of the wood and nuts.

We are very often asked as to whether the English Walnuts that we supply are hardy in the northern part of the United States, and in reply to this would state that there are several commercial English Walnut orchards in our own country here, and we recommend that English Walnuts are hardy and will live and bear fruit in any section that will grow peaches successfully.

American Black Walnut—The common American Black Walnut is a native tree of fast growth and large size. The timber is exceedingly valuable, and is even exported to foreign countries. Trees produce heavy crops of large, oily nuts, which are readily sold at a fair price. 4-5 ft., 80c each.

Chestnut, American Sweet—This is the well known native variety, with medium size sweet nuts. It is the only variety of chestnuts that can rightfully be called sweet. It seldom fails to produce a good crop of nuts each year, and there is always a ready market at a good price. 4-5 ft., \$1.50 each.

English or Madeira Walnut—The largest and most delicious of all the walnut group; produces large crops of thin-shelled, meaty and desirable nuts, which are always in good demand at high price. Makes nice ornamental trees for the lawn. 3 to 4 ft., \$1.25 each.

Butternut—Produces large, long nuts, with a rich, sweet, oily kernel; very nutritious. 4-5 ft., \$1.00 each.

ENGLISH WALNUT

Currants

This is one of the fruits that no garden should be without. Will do well in most any soil, but responds generously to good soil and cultivation. Plant four feet apart each way; prune out old wood so that the remaining shoots will have room to grow; if bothered with currant worm, apply white hellebore to the leaves when damp.

PRICE OF ALL VARIETIES OF CURRANT BUSHES

2 Year, No. 1 Strong Bushes		Each	Ten	Hundred
		\$0.40	\$3.50	\$25.00
Cherry	Berries very large, deep red; acid; bunches short; vigorous and productive. A reliable old market variety.			
Fay's Prolific	The leading market variety. Extra large stems and berries; uniform in size; color, bright red.			
Perfection	Beautiful, bright red, larger than Fay's, holding its size to end of bunch; a great bearer, superior to any other large sort.			
White Grape	Large, yellowish, white, sweet, excellent quality. Best white variety.			
Red Cross	One of the best currants on the market. Ripens in mid-season and produces an enormous quantity of fruit; flavor mild and pleasant.			
Wilder	Ripens the same time as Fay's Prolific, and hangs on the bush much longer; fully as prolific and is in every way as profitable. A popular variety for both table and market. It is one of the strongest growers and one of the most productive varieties on our list. Bunches and berries large, bright and attractive red even when dead ripe.			

Gooseberries

Require the same cultivation and treatment as Currants.

PRICE OF ALL VARIETIES OF GOOSEBERRIES

Strong, 2 Year Bushes		Each	Ten	Hundred
		\$0.45	\$4.00	\$22.50
Downing	Large; handsome, pale green, and of splendid quality for both cooking and table use; bush a vigorous grower and usually free from mildew.			
Houghton's	Medium size, pale red, tender, sweet and good; very productive.			
Josselyn	Fruit large size, smooth, prolific, and hardy, of best quality. A wonderful cropper and strong grower.			

Rhubarb or Pie Plant

Deserves to be ranked among the best early garden products. Continues long in use, and valuable for canning. Make ground rich and deep; plant four feet apart.

Myatt's Linnaeus—An early, tender plant, not tough or stringy; of mild, sub-acid flavor. It is the finest large red market variety.

Price of 2 Year, No. 1 Plants: 20c each; \$1.50 per 10; \$10.00 per 100.

Asparagus

Earliest and finest of spring vegetables. Prepare ground by deep culture, mixing well with rotted manure. Give thorough cultivation and keep clean. Do not cut for use until the plants have grown two seasons.

For home use set in rows 18 to 20 inches apart, with plants 10 to 12 inches apart in the rows.

BARR'S MAMMOTH—Medium early; tender, crisp; light green.

CONOVER'S COLOSSAL—This variety is much superior in size and quality to any other.

PALMETTO—Of Southern origin. Is a good yielder. Earlier than Conover's.

Price of 2 Year, No. 1 Plants: \$1.00 per 25; \$2.50 per 100; \$15.00 per 1000.

RHUBARB (Pie Plant)

ASPARAGUS

Dwarf Pear and Apple Trees

THE dwarf varieties require less than one-fifth the space necessary for the standard varieties, and though the tree is dwarf, the fruit is the same size as standard, and is borne in large quantities. It is valuable both for the home garden and orchard planting for commercial purposes. It is a good filler for apple or standard pear orchards, because it is an early bearer and takes up but a small space. Trees should be planted ten feet apart.

DWARF PEARS

		Height	Caliper		Each	Ten	Hundred

Bourgeat Tree a remarkably strong grower, surpassing all others, yielding immense crops; fruit of large size, round, rich, golden color; very tender when cooked; will keep until February in good condition.

Champion A prolific and constant bearer, fruit averaging larger than the Orange, more oval in shape, quality extra fine and a long keeper; bears very young. Ripens late.

Meech Fruit large, pear shaped, orange yellow; good quality.

Orange Fruit large, bright yellow, of excellent flavor. A vigorous grower, and an immense producer.

Rea's Mammoth A seedling of the Orange, averaging much larger, of the same form and color.

All our trees and plants are strong, well branched, well rooted, 2-year old. This stock should not be classed with one year stock which is being offered on the market for a smaller price.

ORANGE QUINCE

Plums

All Budded on Whole Roots of Imported French Myrobolan Plum Seedlings

THE plum, like the pear and other fine fruits, attains its greatest perfection on our heavy soil, but will succeed on almost any soil that is rich. The plum is entirely free from disease. The curculio, a small dark brown beetle, often stings the fruit, causing it to drop off; by observing the following directions you will get a good crop of fine fruit. As soon as the blossoms have fallen, give the tree a sudden jar by striking a smart blow with a hammer on the stub of a limb sawed off for that purpose; this should be done in the morning while the dew is on.

		Height	Caliper		Each	Ten	Hundred

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.
10% Discount on all Cash Orders mailed before April 15th.

Abundance One of the most popular of all Japanese varieties. The fruit is large, showy and beautiful. It has a bright cherry-red color. The flesh is yellow, firm, juicy, sweet and very delicious. Its season is very early which adds greatly to its value.

Bradshaw A very large and fine early plum, dark reddish purple, juicy and good. Trees erect, very hardy, and vigorous; very productive; valuable for market. The quality is excellent, and is one of the most popular for canning.

Burbank This variety is like Abundance, except that it is deeper in color, and ripens ten to fourteen days later. It is one of the handsomest plums on the market. Fruit is large, reddish purple; flesh yellow, juicy and good. Tree is very hardy and vigorous. It will withstand the frost better than most varieties.

Fellemburg (Italian Prune). A fine late prune; oval, purple, flesh juicy and delicious; very free stone. Good commercial sort. September.

German Prune A large, long, oval variety; much esteemed for drying; color dark purple, of very agreeable flavor. September.

Imperial Gage Rather large, oval, greenish. Flesh juicy, rich and delicious. Parts from the stone. Tree a vigorous grower. Very productive. Middle of August.

Lombard Lombard is a great favorite. The tree adapts itself to any locality, it is extremely hardy, producing good crops where other

varieties will not grow. It is a handsome reddish plum, flesh yellow, juicy and pleasant. An excellent variety.

Niagara It is a very early plum, and valuable for this reason. Red, large size, making an attractive appearance in market, and possesses good shipping qualities. It bears enormous crops of fruit with great regularity. The tree is an upright grower, vigorous and healthy.

Red June Medium to large; deep vermilion red, very showy, flesh light lemon yellow, firm, delightful. The best early market sort. We recommend it for commercial orchard planting. Last of July.

Reine Claude (Bavay's Green Gage). Very large, greenish yellow; juicy, excellent and of fine quality. Not liable to rot. Good bearer and valuable for commercial orchards. September.

Shiro Medium size, yellow and very sweet. The best quality of any of the Japan plums. Recommend it highly for garden planting. September.

Shropshire Damson Large; amber color; juicy and sprightly; productive and not liable to rot. Good commercial sort. September.

York State Prune Large; blue, rich, juicy, fine. Best prune for market or garden. Tree is a vigorous grower and good bearer.

*Quality, Honesty and
Service*

Cherries

All Budded on Whole Roots of Imported French Mahaleb and Mazzard Stock

THE cherry, like the peach, does its very best on light soil, but will succeed in any soil that is dry. The sweet varieties are of rapid growth with large, glossy leaves, forming fine pyramid-shaped heads and producing large crops of luscious, sweet fruit. Sour varieties generally produce acid fruit, and do not attain as large size; are hardier and better adapted for shipping to market.

		Height	Caliper		Each	Ten	Hundred
Largest Size	2 Year	5 to 7 Ft.	$\frac{3}{4}$ & up	XXX	\$0.75	\$6.00	\$50.00
Medium Size	2 Year	4 to 6 Ft.	$\frac{5}{8}$ to $\frac{3}{4}$	XX	.50	4.50	42.00

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.
10% Discount on all Cash Orders mailed before April 15th.

BLACK TARTARIAN CHERRIES

Bing One of the largest black sweet cherries. Flesh juicy but firm. Tree a vigorous, upright grower, and productive. Ripens in July.

Black Tartarian This fine old variety produces immense crops of very large, purplish black fruits of mild, sweet, jelly-like consistency. The tree makes a beautiful, erect growth. Late June and early July.

Early Richmond Best early variety for commercial planting, ripening ten days before Montmorency. Medium size, roundish; color, bright light red. Flesh light colored, juicy and good quality; hangs well to the tree when ripe. Tree hardy, vigorous and very productive; long lived.

English Morello Without doubt one of the most valuable of this class. Easily grown, generally producing a heavy crop. Fruit dark red, quality good, with a rich, acid flavor; late. Tree very hardy for extremely cold latitudes. August.

Governor Wood Large, heart-shaped; light yellow and red; juicy, sweet and rich. Tree a strong grower, with more of a spreading head than most other varieties. Last of June.

Lambert One of the largest sweet cherries and one of the best in quality; dark red, turning almost jet black when ripe. Flesh firm, meaty, rich. Tree rugged, a strong grower, and a young and heavy bearer. Late July.

Large Montmorency The largest and most productive of the sour varieties. The fruit hangs on well after dead ripe, and does not crack or rot in even hot, rainy weather. The flesh is tender, but firm, making it a good shipper. The tree is the largest and strongest grower of the sour varieties; especially hardy and productive; very hardy in bloom and very seldom injured by late spring frosts or severe winter weather.

May Duke Large; red, juicy and rich; an old, excellent variety; vigorous, productive. June.

Napoleon (Royal Ann). The best quality and most profitable yellow sweet cherry. An attractive yellow with bright red cheek. Large size, sweet, heart-shaped. Flesh very firm, juicy and delicious. Tree a vigorous, upright grower and bears heavy crops. Ripens late June.

Schmidt's Bigarreau Fruit large, often measuring an inch in diameter. Color dark purple to nearly black; flesh dark red, very firm; sweet, rich and of good quality. The tree is large, vigorous, spreading in habit and very productive. Ripens in July.

Wragg Said to be an improved English Morello; similar in fruit, but larger. Tree very hardy, long lived and heavy bearer. August.

Windsor Originated in Canada and is one of the hardest of the sweet sorts. Fruit large size; liver colored; flesh remarkably firm and of fine quality; exceedingly valuable as a late commercial variety. Tree an upright, vigorous and rapid grower. Ripens in July.

Yellow Spanish Fruit large, yellow and bright red; juicy, rich and high flavored. Tree moderately vigorous, but productive. Last of June.

For nearly two generations Reilly's trees have stood the test of time; strong and vigorous root, they grow after transplanting.

Standard Pears

All Budded Trees on Whole Roots of Imported French Pear Seedlings

THE cultivation of this noble fruit is extending as its value is appreciated. The range of varieties is such that, like apples, they can be had in good eating condition from August until early spring. The pear succeeds on most soils, but does best on a rather heavy loam or clay. Budded on its own stock it makes a standard tree, and on French or Anger's Quince, a dwarf, the former being the best adapted to large, permanent orchards, the latter to yards and gardens.

		Height	Caliper		Each	Ten	Hundred

SUMMER VARIETIES

Clapp's Favorite Very large size; yellow, splashed with crimson and russet. The flesh is white, fine grained, juicy, melting and of excellent quality. The tree is erect, hardy, healthy, vigorous and very productive. Blooms late and is not liable to be caught by late spring frosts. Ripens ten days before Bartlett.

AUTUMN VARIETIES

Anjou (Beurre d' Anjou). The best commercial pear of its season. Large, handsome greenish yellow, blushed dull red and russet; flesh white, fine grained, buttery, melting and a rich, high flavor. One of the best shippers, and keeps well. The tree is an upright grower, very vigorous, hardy, long lived and productive. Ripens in October; keeps until mid-winter.

Bartlett One of the oldest varieties, and still the most popular, both for commercial orchards and home garden. Fruit large size, clear bright yellow, with blush on the sunny side, buttery, melting and rich flavor. The one great pear for canning, shipping and home use. The tree is erect, vigorous, hardy and a late bloomer. Comes into bearing third year after planting. Season early September.

Beurre Bosc Extra large size; deep russet yellow; high flavored and delicious. Ripens in October and can be marketed at that time.

Duchess (Angouleme). Fruit very large, dull greenish yellow and russet; flesh white, rich and of good quality. A most dependable cropper and profitable market variety. Bears very young, usually the second year after planting. Valuable as both standard and dwarf. October and November.

CLAPP'S FAVORITE

PEARS—Continued

Flemish Beauty Large, yellow, brownish red; flesh tender, juicy and high flavored. Tree very hardy, vigorous and fruitful. September and October.

Kieffer Large size; yellow, with brilliant red cheek. Beautiful in appearance but only fair in quality; flesh is juicy and coarse, but excellent for canning. Kieffer should be picked about the time the leaves begin to fall, and allowed to ripen in a cool dark place. The tree is an exceptionally strong grower, and a young and annual bearer.

Seckel The richest and highest flavored pear grown. Medium to small size; golden yellow, heavily russeted. The flesh is very fine grained, white, sweet, melting and juicy. It is productive to a fault and should be thinned in early summer. Blooms late. Bears about the fourth year. October.

Sheldon A large, round, russet and red pear of very rich, fine quality, melting and delicious. Tree vigorous, bears well. October.

SHELDON

Apricots

BEAUTIFUL and delicious fruit. In quality and appearance is between plum and peach, combining qualities of both. Ripening early, together with its delightful flavor, makes it one of the most valuable fruits. Tree hardy as the peach. Requires about the same cultivation as the peach or plum. It ships well and commands a good price in any market. For drying and canning, it has no superior. The Russian varieties are quite distinct from the other European sorts; much hardier, earlier bearers and productive.

MOORPARK APRICOTS

Largest Size, 1 year, Height 3 to 4 ft., Caliper $\frac{3}{8}$ and up, XXX, Each 85c, Ten \$7.00, Hundred \$50.00.

Medium Size, 1 year, Height 2 to 3 ft., Caliper $\frac{1}{2}$ to $\frac{3}{8}$, XX, Each 75c, Ten \$6.00, Hundred \$40.00.

RATES: 1 to 5 of a kind at each rate; 5 to 50 at 10 rate; 50 and over at 100 rate.

10% Discount on all Cash Orders mailed before April 5th.

ENGLISH VARIETIES

Harris A hardy English sort, that is doing well in this state. Medium size; oblong orange; good quality; very early. The best variety for Eastern culture.

Moorpark One of the largest. Yellow with red cheek, firm, juicy and very productive. An old and dependable variety. August.

RUSSIAN VARIETIES

Alexander Fruit yellow, flecked with red. Prolific. July.

Alexis—Yellow with red cheek, slightly acid but good. July.

Budd—Fruit white with red cheek. An immense bearer. Best late variety. August.

Gibb—Medium, yellow, sub-acid. The best early variety. Last of June.

Peaches

All Budded on Tennessee Natural Pits, Free from Insects and Disease. Perfectly Healthy, Well Ripened Wood, with Splendid Fibrous Roots

THE peach tree requires a well drained, moderately rich soil, a warm sandy loam is probably the best. In order to preserve the continued healthy growth of the tree and the fine quality of the fruit, the tree should have the shoots and branches shortened every year, so as to produce a round, vigorous head with plenty of young wood. In trimming it should be borne in mind that the fruit is produced on the previous year's growth of wood; every spring the trees should be gone over and the new wood cut back about one-half, this will keep the tree well supplied with vigorous fruit buds and bearing wood. Clean culture, annual pruning and frequent examination for borers are the requirements of the peach.

Belle of Georgia Fruit large size; color red and white; flesh white, firm and high flavored. Stands shipping well and brings top prices. Tree a rapid grower and very productive. Perfect freestone. September 10th.

Carman A valuable commercial variety ripening before Belle of Georgia; creamy white with deep blush; skin tough; flesh white; freestone; fruit stands shipping well. Tree is a vigorous grower and very hardy, even under unfavorable conditions; bears well every year. September 1st.

Chair's Choice Has no superior in quality and flavor and for profit is without a rival; large, yellow, free, rich in color, flesh very firm, ripens after Smock; great bearer. October. Freestone.

Champion Large size; creamy white with a beautiful red cheek; flesh white; fine flavor, sweet, rich, juicy, freestone. The tree is hardy and productive. August 25th.

Crawford Early One of the standard early yellow peaches for commercial orchards and home use. Not as hardy in wood or bud as some of the early white sorts, but its high quality and fine flavor make it a favorite. Freestone. August 20th.

Crawford Late One of the very best late sorts, and a very important commercial variety. Very large size; splendid yellow with broad red cheek; flesh yellow, juicy and melting; high quality and rich flavor; freestone. Tree a vigorous grower and a dependable producer. September 20th.

Elberta The leading market variety in all peach growing sections; it seems to thrive wherever peaches can be grown; it is safe to say that one-third of all peaches planted are Elberta. Fruit large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich and sweet. Tree vigorous, hardy, and thrives in the entire peach growing section. Freestone. September 15-20th.

Fitzgerald Large size; golden yellow with red cheek; flesh yellow tinted with red at the pit; juicy and of good quality. Tree me-

dium grower and very productive; bears young. Profitable for market and should be planted where hardy varieties are necessary. Freestone. September 5th.

Greensboro Many commercial growers consider this to be the best of the early peaches. Being somewhat tender it requires care in handling, but reaches market when peaches are in strong demand. Fruit extra large for such an early peach; very handsome, rich, yellowish white with a crimson cheek. Tree a strong grower and extremely hardy in both wood and bud. Semi-cling. August 5th.

Hale (New Yellow) This notable new variety of peach is very large in size. In color it is a deep, golden yellow overlaid with bright carmine. Skin is thick, smooth and without fuzz. Deep yellow, fine grained with a very delicious flavor. Freestone. Late August.

Hiley Fruit large size with a delightful red cheek; flesh is white, tender and exceedingly juicy. A good shipper for an early peach, and brings

J. H. HALE—New Yellow

PEACHES—Continued

good prices. Tree is hardy in wood and bud; a strong grower and good producer. Freestone. August 30th.

Admiral Dewey A perfect freestone, of fine size, form and color, with delicious yellow flesh that is yet firm enough to ship well. The tree is a strong, hardy, symmetrical grower and produces well. Freestone. July.

Rochester Is in a class by itself because it is the only good sized yellow freestone peach of fine quality ready for market in the middle of August in the Northern states. The fruit is large,

yellow with a most attractive red blush; juicy and delicious and keeps well; an excellent shipper.

Salway Fruit large, handsome yellow mottled with red. Flesh yellow, firm, juicy and rich; particularly fine for canning and preserving. Good keeper and shipper. Tree hardy, healthy and good bearer. Freestone. October 10th.

Smock (Beer's Smock). Fruit medium to large size; bright orange yellow beautifully blushed with deep red; the flesh is firm, tender, juicy and of fine flavor. Tree a strong grower and productive. Freestone. September 30th.

William J. Reilly,

Palmyra, Pa.

Dear Sir:—I received my order of trees in perfectly good condition. Am well pleased with your strong rooted, healthy trees, and your honest dealings which give perfect satisfaction. The peach trees which I received from your nursery two years ago are bearing and True to Name. We headed them back severely after planting, and they have made a growth of 8 feet high and 9 feet wide. This is proof of the High Quality of Stock you grow. Several of my neighbors after comparing their trees with mine are sending you their orders, and I will continue to recommend your Stock and Honest Dealings.

Very truly yours,

B. L. HEAGY.

Apples

THE apple rightfully commands first place among our orchard fruits. Unlike other fruits, its season of ripening is such that we can have apples nearly the year around. The following list of varieties are grown in our own nurseries and offered to the planter at cost of production, with one profit added — "The Grower's."

Wholesale Price of All Varieties of Apple Trees Budded on Whole Root Seedlings

		Height	Caliper		Each	Ten	Hundred

RED ASTRACHAN

SUMMER VARIETIES

Sweet Bough Large, pale yellow; sweet, tender and juicy. Tree a compact grower and abundant bearer. August.

Yellow Transparent Medium size, roundish, slightly conical; skin pale yellow when fully matured; flesh tender, juicy, sprightly, sub-acid; good. August.

Early McIntosh A new seedling originated at the N. Y. State Experiment Station, Geneva, N.Y. A seedling of McIntosh and Yellow Transparent. A fine new red summer apple.

Red Astrachan Very early. Medium size; yellow and red; flesh decidedly acid and juicy; it is an excellent cooking apple. Tree very hardy and a good bearer. It is a good commercial apple for local market on account of being very early.

AUTUMN VARIETIES

Fall Pippin Large size; yellow; flesh tender, rich and delicious. Valuable for culinary use and for market. The tree is a strong grower.

Maiden's Blush Large, flat; pale yellow, with red cheek; beautiful; tender and pleasant. September and October.

Pound Sweet A very large, round, yellow russet apple, very sweet and rich. Tree a vigorous, rapid, upright grower; valuable. October to November.

Gravenstein An excellent apple of large size, attractive appearance and excellent quality; one of the best of its season for home use and for market. Fruit red striped with yellow; crisp, juicy and fine flavored; always commanding a high price in the markets.

Oldenburg (Duchess of) Medium to large size; striped red and yellow; flesh white, juicy, of excellent flavor and fine quality. Tree hardy; of Russian origin and will stand the most severe winters; dwarfish grower; makes fine filler. This variety will thrive anywhere that apples can be grown. Good commercial variety.

Rambo Medium size, red and yellow; mild flavor. Tree a strong and vigorous grower and good bearer.

R. I. GREENING

APPLES—Continued WINTER VARIETIES

Baldwin Leading commercial sort. Excellent for export trade. Large, bright red, crisp and juicy. November to March.

Cortland An excellent new offspring of McIntosh developed by the New York State Experimental Station. An Apple of the very highest quality and most pleasing flavor—fully equal if not superior to McIntosh. A little darker red and larger in size than its parent. Often called "The Improved McIntosh." Handles well and is a fine keeper. Ripens about two weeks later than McIntosh. Hangs to the tree better than any variety we know of. Bears young and a full crop every year. Cortland Apples sold last year for \$5.00 per box.

Delicious Large, conical Apple. Brilliant dark red. Excellent quality. Fine for box trade. November to May.

Fameuse (Snow Apple)—Medium, dark red. Crisp. November to January.

Grimes Golden Best yellow Apples. Bears young. Very vigorous. November to January.

Jonathan Medium size red. Excellent quality. November to January.

McIntosh Not equaled in quality and flavor by any other variety except Cortland. Its attractive, bright red color and excellent quality commands the top price in all leading markets. Tree hardy, vigorous, a good annual bearer, comes into fruiting young, yielding large crops. October to December.

WEALTHY

Northern Spy A leading commercial sort. Large, bright red. Excellent keeper. Very pleasing flavor. November to March.

Pumpkin Sweet Excellent sweet Apple. Very large yellow fruit. October to January.

Rhode Island Greening The leading cooking Apple. An excellent commercial variety. Fruit large, yellowish-green. October to February.

Rome Beauty Large, round, mottled and striped in different shades of red; flavor and quality way above the average; appearance and size are its valuable points. December to March.

Smokehouse Color yellow or greenish, mottled with rather dark red. October to March.

Stark Large, striped, mild, sub-acid, good. Valuable as a keeper. January to May.

Roxbury Russet Most popular russet Apple. December to July.

Stayman's Winesap Yellow, striped with dull red. December to May.

Tolman Sweet Light yellow sweet Apple. Excellent for baking. November to April.

Tompkins King Large, attractive, red fruit. Tender and juicy. October to January.

Transcendent Crab Large, bright yellow, with red cheek. Very productive. Late August.

Wagener Large, bright red. Excellent quality. A good filer. October to February.

Wealthy Red and yellow. Very hardy. An excellent filer. October to January.

Winter Banana Attractive yellow, with bright red cheek. Distinct banana flavor. Excellent dessert Apple. November to April.

Roses

OUR roses are all hardy, two year, field grown stock, sure to bloom the first year; in fact most of them have bloomed in the nursery before sending them out. Plant 3 to 4 inches deeper than they stood in the nursery; pack the soil well around the roots; trim the shoots back to 6 or 8 inches, and shade from the sun until they start growing; a good way is to cover with newspaper weighted down to prevent blowing off. When the planting is finished a good soaking with water should be applied; then mulch with coarse manure.

Hybrid Tea or Everblooming Roses

PRICE OF ALL VARIETIES OF ROSE BUSHES (Except as noted).

	Each	Ten
Strong Bushes, 2 year, No. 1.....	\$.65	\$6.00

THE NEW TALISMAN ROSE

No illustration can do this wonderful new Rose justice. The most vividly colored Rose ever introduced. A gorgeous blending of yellow, apricot and gold. A Rose beyond description. It was awarded Gold Medals at all the leading Rose Shows throughout the country. Due to popular demand, the supply of this Rose is very limited. Strong, two-year, field-grown bushes, \$2.00 each.

Columbia—A beautiful pink, shading darker with maturity. The flowers are large, fully double. Fragrant, and borne until late fall. Strong grower.

Crusader—A rose of recent introduction. Color a rich, velvety crimson. Well formed and of good lasting quality. Borne on long, stout stems.

General McArthur—One of the best red roses of this class. Color crimson scarlet. The most beautiful shade of any garden or forcing rose offered. Retains its brilliancy when expanded into flowers of superb form.

Gruss an Teplitz—Bright crimson; fiery-red center; cup-shaped; semi-double. Flowers in clusters. So free in bloom as to present a blaze of scarlet. Should be in every garden.

Kaiserin Augusta Victoria—Pure white. Splendid, large buds and superb, full, double blooms, making the choicest cut flowers. A most sturdy grower, blooming from early spring until late frosts.

Souvenir de Claudius Pernet—Long, pointed buds on long, stiff stems. Large, full flowers with elongated deep petals; yellow, deeper in the center. 75c each.

Killarney, White—A sport from Killarney. Grand in every way. Resembles the Pink Killarney in habits and freedom of bloom. Planted in the garden it comes with a delicate pink tinge that if anything adds to its beauty. A great acquisition and a really wonderful rose.

Lady Ashtown—Deep carmine-pink, shading to yellow at base of petals, with a silvery-pink reflex. An extra good bloomer.

Los Angeles—One of the best garden roses. Beautiful flame-pink, toned coral, shaded gold at base of petals, showing a wonderful and delightful variation in these shades, from the bud to the open bloom. The plant is of vigorous growth and blooms freely. Very fragrant. A very desirable rose. 75c each.

Mme. Butterfly—Color a blending of pink to apricot and gold. Profuse bloomer throughout the season. A strong grower. One of the best newer varieties.

Sunburst—Very select. Lovely bronze yellow, paling slightly at the edge of petals. A very full bloom when open and of good lasting qualities. 75c each.

June 17, 1929

Dear Sir:

Plum tree and Shrubs arrived O. K. Put off writing receipt of them until I saw how they would grow. Planted them 3 weeks ago and they are covered with leaves and the Plum tree is doing fine. I thank you for replacing it after 2 yrs. of the original order was sent in. I don't think many firms would have done so. I shall say a good word wherever I can for you.

Respectfully yours

W. A. Arent.

PINK KILLARNEY

SOUV. DE CLAUD. PERNET

Hybrid Perpetual Roses

Anna de Diesbach—Bright carmine red. Large and full. Very attractive. Vigorous grower. Hardy everywhere in the United States.

Frau Karl Druschki—This grand white rose has become renowned as the very highest type of its class and the best snow-white rose ever introduced. Extraordinary strong grower. Flowers immense in size and produced with great freedom. A true snow-white, the standard by which all other whites are judged.

General Jacqueminot—Crimson-scarlet; large and full. Very fragrant. An excellent rose.

Magna Charta—An old favorite. Very large, full globular bloom of rosy pink, often tinted carmine, remaining on the plant a long time in good condition. A vigorous grower.

Marshall P. Wilder—Rich, glowing red. Large, full blooms produced freely, with a strong, penetrating fragrance. Plant a vigorous grower. One of the best.

Mrs. John Laing—Clear, bright, shining pink; full and double. Perfectly hardy, with immense flowers.

Mrs. R. G. Sharman-Crawford—Large, perfectly formed, deep rose pink blossoms. Outer petals delicately flushed with pale flesh. A strong grower, producing an abundance of blooms.

Paul Neyron—Deep rose, flowers of immense size. Claimed to be the largest rose grown.

Persian Yellow—An old favorite. Very early. Color deep golden yellow.

Prince Camille de Rohan—Universally known as "The Black Rose," owing to its very deep, velvety crimson color, passing to intense maroon, and shaded black. Large, handsome and fragrant blooms.

Soleil d'Or—A rich gold, varying to orange and red. Strong grower.

Ulrich Brunner—Large flowers of a bright clear red, borne on long stems. Plant a vigorous grower. One of the best.

Climbing Roses

Price, 2 Year, No. 1 Bushes, 50c each; 5 for \$2.35

Baby Rambler—A dwarf (bush). Just the thing for beds and borders and for edging walks. Bound to take the place of geraniums and other plants. Crimson and white, Pink.

Climbing American Beauty—This new climbing form of the famous pink rose, so long the favorite for cutting, is as lovely and fragrant and deep pink as the bush form. The hardy climbing wood with which it is crossed gives healthy, perfect foliage and a strong, climbing habit of growth.

Crimson Rambler—Bright crimson flowers, produced in large clusters of pyramidal form; grand variety for pillars and arches and to train over porches, also makes a fine hedge.

Dorothy Perkins—A most delightful deep pink; the flowers are borne in large clusters of small double blooms and are very sweetly scented. The strongest and most satisfactory of the rambler or climbing class.

Flower of Fairfield—A counterpart of Crimson Rambler in every respect, except that it shows ever-blooming tendencies, many new growths being terminated with large clusters of flowers.

Paul's Scarlet Climber—The flowers, of a vivid scarlet, are of good size, semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes, the plants being literally covered from top to bottom with bloom. It is of strong climbing habit and perfectly hardy. This is one of the most popular climbing roses. See front cover.

Tausendschoen—The flowers upon first opening are of the most delicate shade of pink ever seen in a rose, the bright clusters of blossoms almost covering the handsome pale green foliage. A vigorous climber with few thorns.

PAUL'S SCARLET

White Rambler—Grows vigorously in clusters of pure white flowers.

Yellow Rambler—A hardy climber. Double golden-yellow flowers in large clusters.

ROSE COLLECTION No. 3 CLIMBERS

3 Climbers

for..... **\$1.25**

CRIMSON RAMBLER (Red)

DOROTHY PERKINS (Pink)

TAUSENDSCHOEN (Pink)—Shading to White.

Ornamental and Shade Trees

BY all means plant shade trees. They are effective ornamentally from the time they are set out and soon their spreading growth will create a sheltered environment for the home that will be a pride and joy with the passing years. Contrast the heat and glare of downtown streets on a hot summer day with the inviting coolness and beauty of a well shaded residential avenue. Shade trees make the difference and the nominal outlay for planting is returned a hundredfold in greater property value and the enjoyment of pleasant surroundings.

Bechtel's Crab (Double Flowering)—The flowers are a beautiful pink; very sweet scented; two inches in diameter; blooms in May. Grows twenty to thirty feet tall. 3 to 4 ft., \$1.00 each.

Birch, American White—A large, vigorous, upright tree with smooth white bark and handsome foliage. Very effective when planted in front of evergreens, to afford strong contrast. 4 to 5 ft., \$1.50 each; 6 to 8 ft., \$2.00 each.

Birch, Cut-Leaf Weeping—An elegant, erect tree, with slender, drooping branches and fine cut leaves. A magnificent variety and worthy of a place on every lawn. 5 to 6 ft., \$2.50 each.

Catalpa Bungei (Umbrella Catalpa)—Grafted on stems 6 to 7 feet high, it makes an umbrella-shaped top without pruning. A very desirable ornamental for the lawn, or along the driveway. Perfectly hardy. \$1.50 each, 2 for \$2.50.

Elm, American—One of the very best shade trees for lawn, street or park; has wide, spreading head and graceful, drooping branches; attains very old age and large size. 7 to 9 ft., \$1.50 each; 9 to 10 ft., \$2.00 each.

Maple, Norway—Supposed to be the best of the maples for street planting; grows to large size, with head usually round and perfect in form, with deep green foliage. 6 to 8 ft., \$2.00 each; 8 to 10 ft., \$3.00 each.

Silver Maple—Of excellent rapid growth and desirable where quick shade is wanted. 8 to 10 ft., \$1.25 each; 10 for \$10.00. 10 to 12 ft., \$2.00 each; 10 for \$18.00.

Sugar or Rock Maple—Straightest and most upright grower of all the maples; it is of grand proportions, often reaching the height of 100 feet; it roots deeply, allowing the grass to grow up close around the trunk and it does not upheave the sidewalk as badly as other varieties when used for street planting. 6 to 8 ft., \$2.50 each; 10 for \$22.50. 8 to 10 ft., \$3.00 each; 10 for \$27.50.

LOMBARDY AND CAROLINA POPLARS

Poplar, Carolina—The most rapid growing tree we have; especially desirable where quick returns are wanted; it is a vigorous, healthy, native tree, pyramidal in form, with large, glossy leaves, valuable for park or street planting.

Lombardy Poplar—Well known for its erect, rapid growth and spike-like form; not as good for shade as the Carolina.

Price, 8 to 10 ft., 60c each; 10 for \$5.00. 10 to 12 feet, 75c each; 10 for \$6.00

Liberty, N. Y.,

The Wm. J. Reilly Nurseries,

Gentlemen:

Inclosed please find check in payment of Spruce trees. Everything in this year's order has come through in fine condition and as usual, when doing business with you, we were entirely satisfied. Please accept our thanks for the well-rooted, stocky plants, bushes and trees you sent us, every one a specimen in its makeup. Of forty some odd trees obtained from you last year only two died; a wonderful feat for this mountainous section. With best wishes for your continued success and assuring you of our appreciation of your most honorable treatment, we are,

Very sincerely yours,

Goerke (Health) Cottage.

70c each; 3 for \$1.95.

ARBOR VITAE—*Thuja Occidentalis* Var. *Pyramidalis*
2-2½ ft. \$3.00 each; 3 for \$8.00

Evergreen Trees

OUR evergreens are all carefully grown at good distances for symmetrical development, are root and top pruned into handsome, shapely specimens that will transplant successfully to new homes with ordinary care. Planting season for spring from April 10 to May 15, for fall from about August 15 to October 10, depending on season and locality. We have selected specimens in many varieties on which we would be glad to quote prices on receipt of list, stating kinds, sizes and numbers wanted. All evergreen trees will be carefully dug with ball of earth about the roots and tightly sewed in burlap, and will stand transportation and transplanting with little risk of loss. In planting it is not necessary to remove the burlap. Place tree in properly prepared hole, cut burlap in several places, firm earth tightly about ball of roots, water and mulch.

ARBOR VITAE (Thuya)

American (White Cedar)—A beautiful native tree commonly known as the White Cedar; especially valuable for screens and hedges. Grows rapidly and soon forms a beautiful hedge, for which purpose it is one of the best evergreens. One of the few varieties that may be successfully sheared. Fine for planting singly or in groups with other evergreens. Price, 2 to 3 ft., \$2.00 each; 10 for \$18.00. 3 to 4 ft., \$3.00 each; 10 for \$25.00. 4 to 5 ft., \$4.00 each.

Compacta—A handsome dwarf; dense, perfect form; a charming shade of green. Price, 18 in., \$2.00.

Ellwangeriana—A low, broad pyramid with slender branches; foliage intermediate in texture. Price, 15 in., \$1.50 each.

Geo. Peabody (Golden Arbor Vitae)—A moderate grower. Foliage golden-yellow, and retained well throughout the year. Very good for producing color contrasting effects. Price, 18 to 24 in., \$3.00 each.

Globe Arbor Vitae (Globosa)—Light green foliage of a grayish cast. A neat globular outline adapts this Arbor Vitae for formal plantings, tub and window box use, as well as in the foreground of evergreen groups. 18 in., \$2.25 each.

Pyramidalis—Most compact and erect of the entire species. Symmetrical, columnar, outlined with dark green foliage. So arranged as to give a crested effect to the tips of the branches. Price, 2 to 2½ ft., \$3.00 each.

Siberian—A superb variety, somewhat similar to American, with heavier and fuller foliage and more compact habit. It holds its color during winter and bears trimming well; one of the hardiest. Price, 18-24 in., \$1.50 each.

FIR

Concolor (White Fir)—A picturesque Colorado species; long, leathery leaves, with glaucous tinge when young, becoming green with age. Branches arranged in horizontal whorls. A fine tree, makes splendid specimens. Price, 18 to 24 in., \$5.00 each.

Douglassi—From the mountains of Colorado. A rapid grower, foliage somewhat resembles Hemlock, leaves light green above, glaucous below. Conical form, branches spreading. Price, 2-3 ft., \$3.50 ea.

GLOBE ARBOR VITAE

SPRUCE

Colorado Blue—A rare, elegant tree with foliage of rich blue. Tree usually has a symmetrically shaped, narrow, pointing or rounding top; is hardy and quick growing. Price, 1½ to 2 ft., \$7.00.

Norway—A lofty, noble tree of open, pyramidal habit; exceedingly picturesque. Very popular and effective in evergreen groups and one of the best evergreens for hedges. Prices, 2 to 3 ft., \$2.00 each; 3 to 4 ft., \$3.00 each.

JUNIPER

Irish—Erect, slender and formal in habit; foliage sage green, very compact; making a splendid column, sometimes 15 to 20 feet high; much used in cemeteries. Price, 1 to 1½ ft., \$2.50.

Prostrata—Low, compact grower, making a dense mat over the surface of the ground. While it grows close to the ground, not over 6 to 8 inches in height, it may spread out to a distance of 12 feet or more. Price, 18 in. spread, \$3.00 each.

Sabina—Handsome moss green foliage; adapted to use as a filler in evergreen groups, or as a dwarf ground cover. Price, 18 in., \$3.00.

Virginiana (Red Cedar)—A well known American tree with fine, dense foliage, varying in habit and color, the majority being formal and bluntly conical; others loose and irregular. Price, 2 to 2½ ft., \$3.00 each.

Austrian Pine—Tall, massive, with spreading limbs and long, stiff needles. Thrives along the coast, inland and under city conditions. Handsome for specimen or open group planting. Price, 2 to 3 ft., \$3.25 each.

HOW TO ORDER

Buy from the Reliable Grower and Save Disappointment at Fruiting Time

In presenting this 40th edition of our catalog, we wish to extend thanks for your past patronage and assure you and all customers of the same High Quality of stock and personal service as in the past.

Order Early as our orders are shipped in the rotation they are received—first come, first served. If you want your order shipped on a certain date, mark it so on the order and we will get it off as nearly at that time as possible. Our regular shipping season begins about March 20th in spring and October 15th in fall.

Packing Free. We make no charge for boxing, packing, or delivering to freight station or express office. All orders are put up in boxes or bales, lined with heavy paper to guard against drying out. The trees and plants are packed in moist excelsior and straw.

Prices. Our prices are f. o. b. Dansville, purchaser paying the transportation charges on arrival.

Discount. We allow a discount of 10% on all orders for which cash is received before April 15th. After that date 5%.

References. Our satisfied customers are our best recommendations. See a few of their letters in this catalog. We would also refer you to the Citizens Bank and Merchants & Farmers Bank, both of Dansville, Dun's or Bradstreet's Commercial Agencies.

Terms. Cash before shipment. If you wish to buy on other terms, state them, giving reference and responsibility. You need not, however, send full amount with your order, send one-fourth and the balance when shipment is wanted.

Remittance should be made by Bank Draft, Express Money Order, Post Office Money Order, Registered Letter or your own personal check.

In ordering use the enclosed order blank and give full shipping directions. If Post Office address is different from railroad station, be sure to give both.

Agents' and Dealers' orders billed out and tagged for delivery to customers without additional charge.

C. O. D. Orders. We ship trees and plants C. O. D., providing 25% of the total amount is sent with order. If the order goes by express you pay the balance to your express agent on arrival. If shipped by freight you pay the balance at your bank, where you will also find Bill of Lading, which you present to freight agent, who will deliver shipment to you.

WE GUARANTEE ALL STOCK TO BE

First-class in every respect

Up to Size and Grade paid for

Free from dangerous Insects and Disease

To reach destination in good condition.

Secure Varieties Now—Pay at Shipping Time

If you want to secure certain varieties of trees and have not the ready cash to pay for the same, send us your order accompanied by a small remittance, just enough to show us you mean business, say one-fourth of the amount of your order, and we will book your orders and hold them for you until such time as you may want them shipped, when you can remit the balance. Orders placed with us early have the privilege of being shipped early if desired.

Our Guarantee is as Follows:

To deliver all stock at destination in first-class condition, also to be true to name and free from disease. Should any arrive otherwise we must be notified within five days after arrival and we will make proper adjustment.
